CHAPTER (I)

EXECUTIVE SUMMARY

(a) About the industry:

Bangladesh is a large and densely populated country in South Asia. Bangladesh has in 2018 an estimated population of 166.37 million. The growth rate of population now is 1.03% in Bangladesh. Focusing on Bangladesh, within the last 10 years the scope for food and beverage industries have increased substantially.

The food and beverage market has high growth potential here. Moreover, the size of middle class is also becoming very big every day. The purchasing power of growing middle class is also increasing. This leads to demand for processed food and beverages. Because of hot and humid climate and lack of pure drinking water source in Bangladesh, demand for beverage items is increasing at a higher pace. Market is growing at more than 8% per year. Bangladesh Govt. is also offering attractive export cash incentives for exporting agro based products from Bangladesh. Because of the availability of labor and raw materials at a cheaper rate, and export incentive benefits, Bangladeshi food products are enjoying competitive market positions in the foreign markets as well.

Bangladesh is turning into developing country and per capita income rose to 1700 USD in 2017 and health & hygiene consciousness among the population also rose. Because of all these contributing factors the demand for bottled pure drinking water and other bottled beverage like CSD drinks, Juices increased substantially. Global warming is also contributing to the growth of the beverage market.

Biscuits are fast becoming the snack of choice for Bangladeshi consumers, enabling the market to grow 15 per cent a year, said industry insiders.

The market for both branded & non branded biscuits is now worth 50-60 billion Taka, with large, well-known brands taking up a major share. The biscuit market is growing mainly because of consumers' hunt for hygienically prepared foods. It is expected to grow at the same pace in the next 10-15 years.

The annual market for branded biscuits is nearly 30 billion Taka now. The market was earlier dominated by small bakeries. Demand for biscuits is growing as entrepreneurs have shifted to automation in baking and consumers are looking for a variety of quality foods at low prices.

Encouraged by rising demand, particularly from the lower middle and middle income groups, a number of large firms have joined the foray in the last several years. Some old players have also expanded their production capacity and small companies are also joining this market.

Today, nearly 5,000 bread and baked goods makers, including 100 automatic and semi-automatic bakeries, are operating in the segment.

Moreover, the Bangladesh candy market is witnessing a revolutionary change in ingredients owing to the customer's concern over high sugar content in the candies. Coffee accounts for 10% of total market share in 2016, at an estimated CAGR of 8.3% during the forecast period. By distribution channel, the market can be categorized into supermarkets/hypermarkets, online retailers, and convenience stores. Retail trade is a traditional business in Bangladesh; its expansion is keeping pace with the country's population growth and changes in consumption patterns consistent with economic growth.

DESCRIPTION OF THE ISSUER

পুঁজিবাজারে বিনিয়োগ ঝুঁকিপূর্ণ। জেনে ও বুঝে বিনিয়োগ করুন

(a) Summary:

- (i) The summary of the industry and business environment of the issuer. The summary shall not be one-sided or biased to highlight the issuer or the issue;

Summary of the industry:

Bangladesh is a large and densely populated country in South Asia. Bangladesh has in 2018 an estimated population of 166.37 million. The growth rate of population now is 1.03% in Bangladesh. Focusing on Bangladesh, within the last 10 years the scope for food and beverage industries have increased substantially.

The food and beverage market has high growth potential here. More over the size of middle class is also becoming very big every day. The purchasing power of growing middle class is also increasing. This leads to demand for processed food and beverages. Because of hot and humid climate and lack of pure drinking water source in Bangladesh, demand for beverage items is increasing at a higher pace. Market is growing at more than 8% per year. Bangladesh Govt. is also offering attractive export cash incentives for exporting agro based products from Bangladesh. Because of the availability of labor and raw materials at a cheaper rate, and export incentive benefits, Bangladeshi food products are enjoying competitive market positions in the foreign markets as well.

Bangladesh is turning into developing country and per capita income rose to 1700 USD in 2017 and health & hygiene consciousness among the population also rose. Because of all these contributing factors the demand for bottled pure drinking water and other bottled beverage like CSD drinks, Juices increased substantially. Global warming is also contributing to the growth of the beverage market.

Biscuits are fast becoming the snack of choice for Bangladeshi consumers, enabling the market to grow 15 per cent a year, said industry insiders.

The market for both branded & non branded biscuits is now worth 50-60 billion Taka, with large, well-known brands taking up a major share. The biscuit market is growing mainly because of consumers' hunt for hygienically prepared foods. It is expected to grow at the same pace in the next 10-15 years.

The annual market for branded biscuits is nearly 30 billion Taka now. The market was earlier dominated by small bakeries. Demand for biscuits is growing as entrepreneurs have shifted to automation in baking and consumers are looking for a variety of quality foods at low prices.

Encouraged by rising demand, particularly from the lower middle and middle income groups, a number of large firms have joined the foray in the last several years. Some old players have also expanded their production capacity and small companies are also joining this market.

Today, nearly 5,000 bread and baked goods makers, including 100 automatic and semi-automatic bakeries, are operating in the segment.

Confectionary/Candy

পুঁজিবাজারে বিনিয়োগ ঝুঁকিপূর্ণ। জেনে ও বুঝে বিনিয়োগ করুন

The Bangladesh candy market is witnessing a revolutionary change in ingredients owing to the customer's concern over high sugar content in the candies. Coffee accounts for 10% of total market share in 2016, at an estimated CAGR of 8.3% during the forecast period. By distribution channel, the market can be categorized into supermarkets/hypermarkets, online retailers, and convenience stores. Retail trade is a traditional business in Bangladesh; its expansion is keeping pace with the country's population growth and changes in consumption patterns consistent with economic growth.

Business environment:

The Issuer's business environment is conducive to the business as we have good supply of food and beverage items. The Company has skilled labors as well. The wage of labor is reasonable also. Government policy is favorable to the sector. Overall, it is a business-friendly situation.

The processed food industry has potential to contribute to value addition and employment in Bangladesh. It accounts for over 22% of all manufacturing production and employs 20% of the manufacturing labor force. The sector is dominated by small and medium-sized enterprises strongly linked to local production. There are nearly 700 food-manufacturing enterprises in the country processing baked goods, confectionery, fruits and vegetables, cereals, dairy goods, fruit juices, and various other foods and beverages.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements and Internal Controls

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, The Companies Act 1994, The Securities and Exchange Rules 1987 and other applicable laws and regulations and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

Expenditure incurred after the assets have been put into operation, such as repair and maintenance is normally charged off as revenue expenditure in the period in which it is incurred. In situation where it can be clearly demonstrated that the expenditure has resulted in an increase in the future economic benefit expected to be obtained from the use of fixed assets, the expenditure is capitalized as an additional cost of the assets. All other costs are recognized to the profit and loss account as expenses if incurred. After considering the useful life of assets as per BAS-16 'Property, plant and equipment', the annual depreciation rates have been applied as under which is considered reasonable by the management.

পুঁজিবাজারে বিনিয়োগ ঝুঁকিপূর্ণ। জেনে ও বুঝে বিনিয়োগ করুন

Our Status: The Company experiences different seasonal aspects as the products are quite related to seasonal demand. For carbonated beverage and fruit drinks the demand of the products goes down during the winter season but mustard oil is not completely dependent on the seasonal change. The products of the company are being sold round the year. Besides Market scenario is changing from time to time and demand for new products are increasing day by day. To grasp the ongoing opportunity, we have to diversify our production lines. Therefore, we are to procure new machineries for new product lines based on market demand.

Details of production capacity utilization are outline below:

Item	Unit	Production Capacity	Actual Production	Capacity Utilization
Juice and Drinks	Pcs	36,864,000	1,237,172	3.36%
Mineral Water	Pcs	11,059,200	227,820	2.06%
Soft Drinks	Pcs	44,236,800	3,376,374	7.63%

Query No. 8: In the year 2017 the company has given loan amounting to Tk. 30 lacs to BD Sunlife Securities Ltd without charging interest and we sought to submit documents regarding disbursement of loan and receiving the same. From the bank statement it appears that the company has given loan to BD Sunlife Securities in cash which is not in line with the condition no. 11 of consent letter on raising capital dated 28.02.2018. Explanation is required with documentary evidence;

Our Status: The documents of disbursement and receiving of the loan amount of Tk. 30 lacs to BD Sunlife Securities Ltd. is submitted herewith as **Annexure-6**.

Query No. 9: In the year 2016 the consumption of electricity has reduced by Tk. 20,13,060 (Tk. 1,61,87,333-Tk. 1,41,74,273) where the revenue income has increased by Tk. 22,48,15,278 (Tk. 57,45,44,333- Tk. 34,97,29,055) then previous year 2015. Explanation from the company is required;

Our Status: Consumption of electricity has reduced Tk. 20, 13,524 due to following reasons:

- 1) Less electricity consuming machines were run during the year.
- 2) Consumption of fuel for generator has increased during the year due to running more hours.
- 3) Labor and machines efficiency has increased during the year.
- 4) The revenue was earned more from the selling of different SKUs of various spices and mustard oil. For production of those products we used semi-automatic machineries which consumed less electricity and these machineries are labor intensive.

Query No. 10: As per calculation, Weighted Average Earning per Share is Tk. 0.43 where the Market P/E (according to DSE information) is 12.47. So the Earning Based Value per Share stands at Tk. 5.36 which is below par value. Explanation is required with documentary evidence;

পুঁজিবাজারে বিনিয়োগ ঝুঁকিপূর্ণ। জেনে ও বুঝে বিনিয়োগ করুন

Our Status: Market P/E reflects overall performance of all companies listed in an Index. It is unlikely to be an accurate measure of an industry performance, in particular. Making a comparison to be valid, to the extent possible it has to be a like for like comparison. The company we analyzed falls under the food sector and most of good companies in this category traded over a higher P/E ratio relative to market P/E. Investors give more prices to that company which shows high growth opportunity. The fundamental rule of growth companies around the world is that they always trade at a higher P/E. BD Thai Food and Beverage Ltd is not an exception to that. As a result, we understand industry P/E instead of market P/E will be more representative for BD Thai Food and Beverage Ltd. and thus consider industry P/E to calculate the earning-based valuation to justify the fair price.

Moreover, Valuation under different valuation methods as per Bangladesh Securities and Exchange Commission (Public Issue) Rules, 2015 are outline below (**copy attached-7**):

Particulars	Amount (in Tk.)
Method 1: Net Asset Value (NAV) per share	
1 (A) Net Asset Value per share with revaluation	13.62
1 (B) Net Asset Value per share without revaluation reserve	12.22
Method 2: Historical Earnings based valuation	
2(A) Earnings based Value per share (Market P/E)	4.91
2(B) Earnings based Value per share (Sector P/E)	8.50
Method 3: Average market price of similar stock based valuation	23.63

Therefore, we can conclude that the issue share at par value is fair and justified.
